HSC TRUE REWARD

WESTERN'S EARLY OFFER PROGRAM

Our HSC True Reward early offer program will give school leavers much needed peace of mind, providing students an early offer into most university courses based on their Year 11* or Year 12 results.

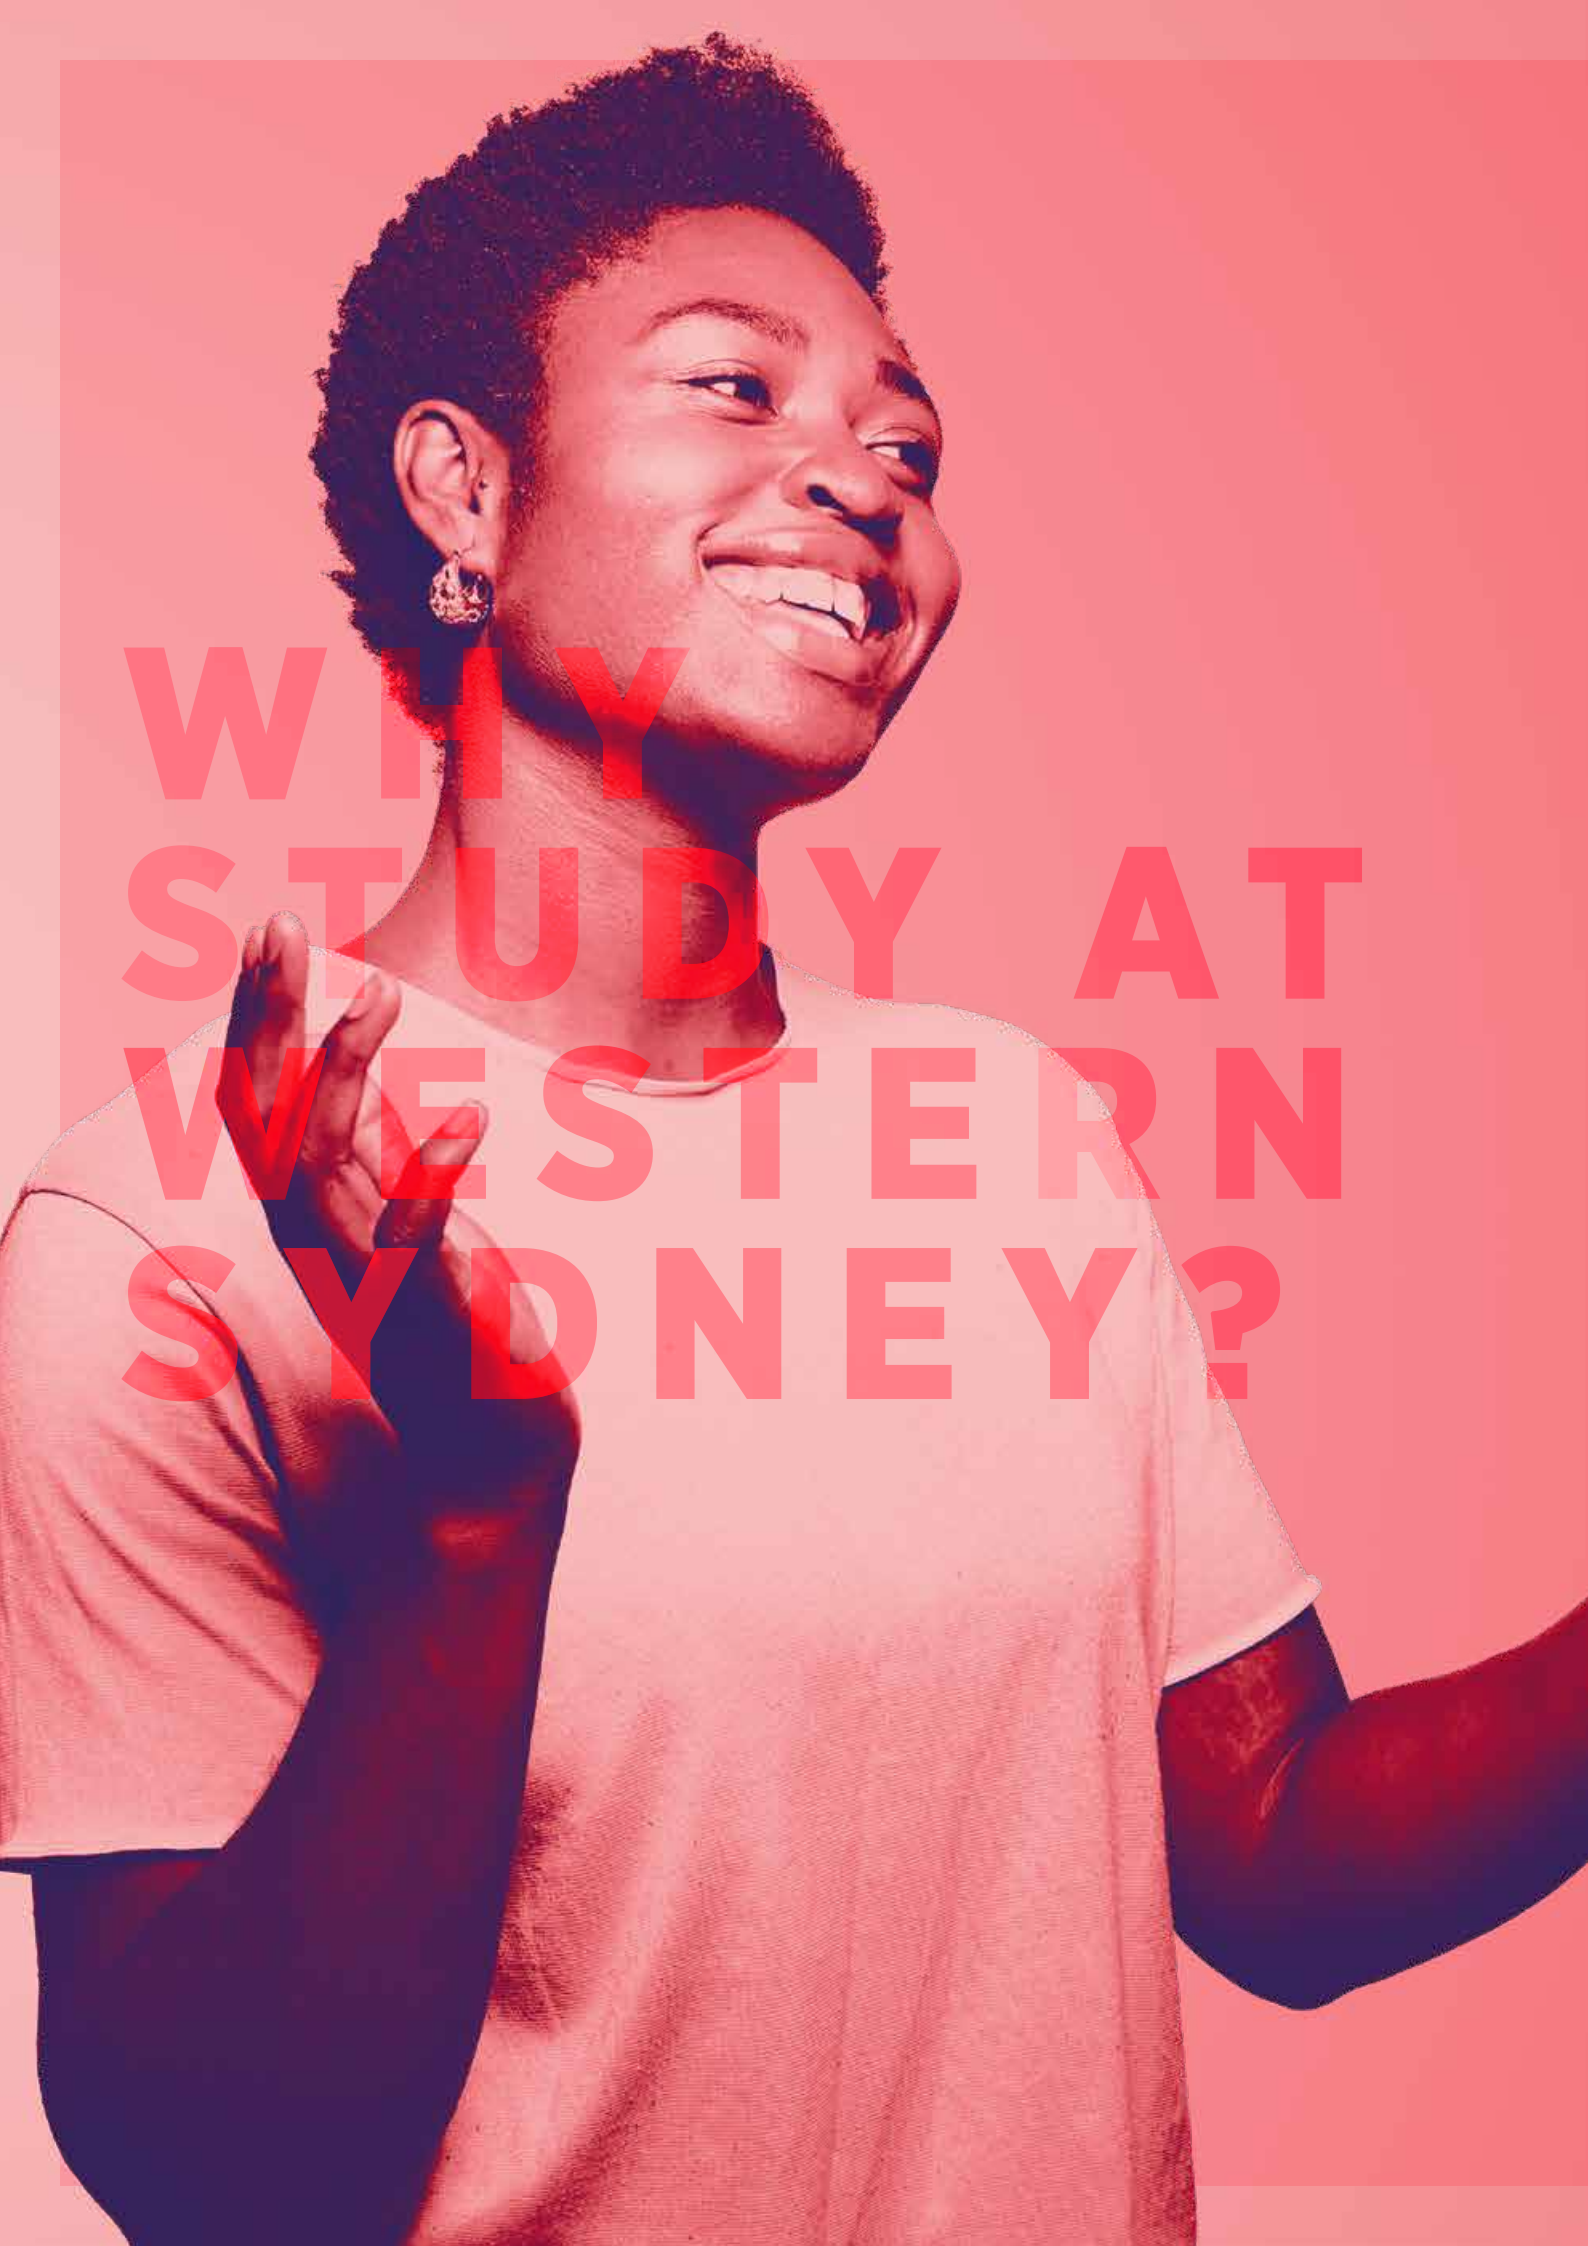

HSC True Reward was first launched in 2017, providing students an early offer into Western based on HSC results, instead of a scaled ATAR, following analysis showing subject performance is a robust key performance indicator of student success.

* Offers made on Year 11 results are based on the condition that students successfully complete their HSC and any other specified requirements.

Students will also, as part of the program, get access to Western's ground breaking digital experience platform – Alpha Edge. The Alpha's Edge playlist within the platform will allow students to explore learning activities around career path decision making as well as university preparation.

Our research doesn't just happen in the lab. We work with regional, national and international partners to deliver research that has a positive impact on the economic, social and environmental wellbeing of our communities.

Responding to the challenges faced by the communities we serve, our research work is focused on four key themes:

Urban Living Futures and Society

Our research in this area seeks to understand and guide change in the economy, our society and the culture we live in. Our research work shows how the places we live, the work we do, the way we describe ourselves and the relationships we form interrelate.

Health and Wellbeing

We take an integrated approach to health research, based on the assumption that the environments in which we live, the cultural background from which we come, and the work we do all affect our physical and mental health. Our research explores how health initiatives can prevent disease and illness, encourage healthy lifestyles in individuals and communities, and reduce the cost and impact of illness.

Education and Work

We draw on the diversity of Western Sydney to underpin research that explores education access on a global scale. This research theme respects the economic, social and cultural aspirations of the individuals and communities we support. We are committed to realising the opportunities offered by new pedagogies and transformational technologies for all of our students.

Environment and Sustainability

We are in the midst of unprecedented global environmental changes affecting the world. These are creating new challenges that range from contested land use to urban and agricultural climate change adaptation, to biodiversity conservation, and new interdisciplinary ways of engaging with socioecological dynamics. Our research takes a practical and collaborative approach to solving these challenges by focusing on maintaining and managing the diversity of urban ecologies, and agricultural and natural systems.

And depending on the majors and electives you choose, the Bachelor of Business can also see you graduate with industry-specific accreditation from Australia's leading institutions. You can either pay this upfront or apply for assistance through the Commonwealth Government's Higher Education Loan Program (HECS-HELP). If you apply for this option, the amount of HECS-HELP debt you accumulate depends on which band of study your subjects fall into, and how many subjects are studied in the year (see table above).
